

TUBEX ECOFOREST

Twin-wall tree shelter that provides a greenhouse effect, specially designed for use in forestry plantations. It promotes plant establishment and protects plants from mechanical actions and physical damage caused by animals.

Solid tree shelter that is quick and easy to install with or without stakes (for heights greater than 60 cm, we recommend always using a stake)

Made of polypropylene with UV stabiliser and designed to provide a minimum life span of 5 years; however, in less sunny areas, it may provide a life span of 7 or 8 years.

Available in two models: the **VENTILATED** tree shelter is ideal for plants requiring greater ventilation, and the **SOLID** tree shelter is recommended for an increased greenhouse effect.

It has a laserline, which distinguishes it from other tree shelters on the market, to ensure that the tube splits if the diameter of the trunk exceeds the diameter of the shelter before it degrades.

Flared top rim to prevent abrasion to the plant stem.

Reinforced tie or strapping attachment point.

SPECIFICATIONS

Polypropylene with UV stabiliser

Height: 50 cm, 60 cm, 75 cm, 90 cm and 120 cm

Diameter: 7.6 cm - 10.5 cm (nests of 5)

Colour: green or brown

Ventilated or solid

Anti-abrasion flared top rim

Laserline

Tie or strapping attachment points with reinforced strip

The Ecolivo model includes a laserline (line of laser-generated perforations) to ensure that the tube splits if the diameter of the olive tree trunk exceeds the diameter of the tree shelter before it degrades

Flared top rim to prevent abrasion to the plant stem

Reinforced tie or strapping attachment point

ECOFOREST solid (Colour green)

Height [cm]	Packaging	Ref.
