

V8 - NET WITH VERTICAL REINFORCEMENT

Cylindrical protective netting characterized by its excellent rigidity, increased grammage and smaller mesh size.

Specially designed for use at forestry plantations and in any open spaces.

It has **8 VERTICAL REINFORCEMENTS** to make it stronger and to allow it to be quickly installed without staking by pushing it into the ground for heights of up to 70 cm. For greater heights, we recommend using a stake. This netting can be manufactured with a higher grammage to make it extra strong.

Excellent windbreak and shade effect.

SPECIFICATIONS

Polyethylene

3 x 3 mm mesh

Diameter: 12 cm

Normal height: 60 cm, 70 cm, 120 cm, 150 cm and 180 cm

Weight of standard model: 130 g/lm (see other possible grammages)

Colour: black
